DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wallrafen, cited on applicant's IDS in view of Passow.

Wallrafen disclosed the claimed invention except for an individual contact of the resistance device is assigned at least two tongues. Passow discloses employing bifurcated double-break contacts for the purpose of improving connection reliability (col. 1, lines 10-63). It would have been obvious at the time the invention was made to a person having ordinary skill in the art to employ in Wallrafen a contact with two tongues for the purpose of improving connection reliability.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hitachi discloses a relay having bifurcated contact springs.
